

# DREAM HOMES

## Quality Modular and Sectional Homes

Dream Homes Inc. was established over 25 years ago when I was looking into options for the purchase of my first home. I researched and compared new construction or "stick-built" homes, older established homes, and modular homes. The more I explored modular home building, the more impressed I became with the process itself, the first-rate materials used inside and out, the high quality that a controlled environment ensures, and the eye-catching finished product. In fact, I became so interested in modular home building, that I established Dream Homes in 1986, and we have been providing affordable quality homes to hundreds of families ever since!

In the same manner I thoroughly investigated various types of homebuilding techniques, I also researched modular home construction companies. Consequently, I am a dealer for Muncy Homes of Muncy, Pennsylvania - an outstanding industry leader in the field of modular home construction with sales of over 500 houses annually in 13 Northeastern states.

If you have found a floor plan you love, bring it in or send it over! We can work together on pricing and options to make your dream home a reality.

We love what we do here at Dream Homes and are committed to making your home-buying experience a very pleasant one! We will help you through the process from permits and plans to excavation, delivery, and finishing touches. Our customers have "peace of mind" knowing that they have selected the best home and best after-sale service available!

I encourage you to thoroughly research what may be the largest investment of your lifetime. I am confident you will find, as I did, modular homes to be well-built, attractive, and cost-effective; as well as a time-efficient and stress-free way to enjoy the purchase and design of your own brand new dream home.
